

Costellazioni e angoli

Utilizzando un goniometro misura gli angoli

  @emozioniinmatematica

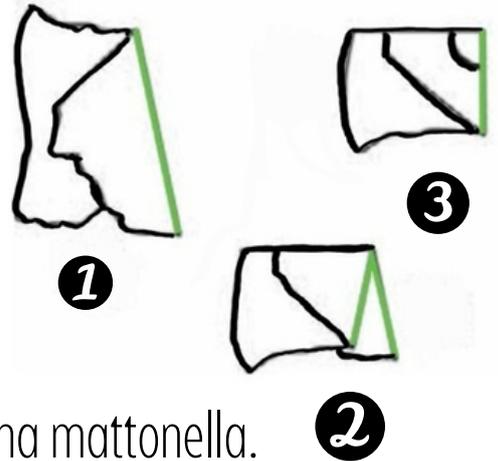

Angolo campione

Impariamo a costruire un angolo retto

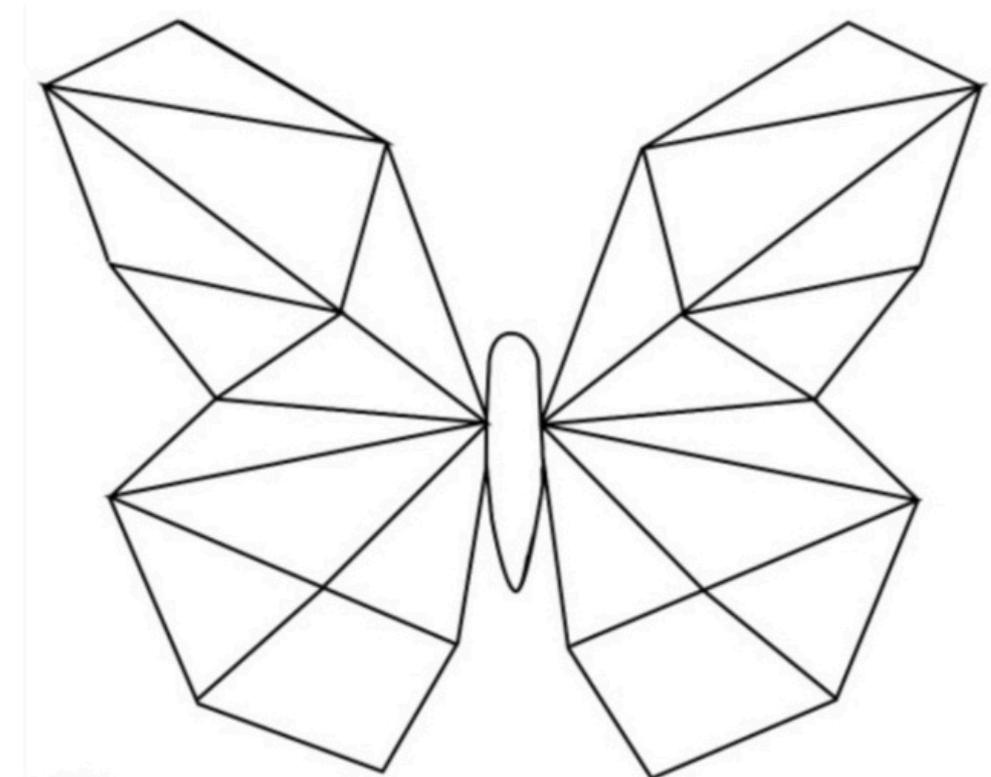

- 1) Prendi un foglio e piegalo come preferisci.
- 2) Piegalo ancora lungo la prima linea.
- 3) Il tuo angolo retto è pronto.

Utilizzalo per misurare gli altri angoli.

Verifica la precisione del tuo angolo campione sovrapponendolo all'angolo del tuo banco o di una mattonella.

Colora di rosso gli angoli acuti, di verde quelli ottusi e di azzurro quelli retti.

Angoli nel mio nome

Osserva gli angoli presenti nel mio nome.

Indica accanto a ciascun angolo la sua misura.

Aiutati con un goniometro.

Scrivi qui il tuo nome e disegna gli angoli in esso presenti

Diario lunare

Osserva la luna per 28 giorni.

Disegna ciò che osservi indicando la data.

Angoli e costellazioni

Avrete bisogno di un cartoncino blu A4 e delle stelline Dorate adesive.

Scegliete la costellazione da costruire. Unite le linee e colorate gli ingoli interni o esterni. Misurate utilizzando un goniometro.
